

Lista 31 – React

Primeiramente instale a extensão [React Developer Tools](#) dentro do Chrome. Torne-a sempre visível.

Siga o vídeo [CRIANDO Todo List com ReactJS – JavaScript](#) para criar um aplicativo de lista de coisas a fazer.

Observação: Logo após criar o projeto, siga utilizando o npm em vez do yarn.

```
C:\Windows\system32\cmd.exe x + v

Created git commit.

Success! Created todo at C:\dev-ti\react\todo
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

  npm test
    Starts the test runner.

  npm run eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd todo
  npm start

Happy hacking!
C:\dev-ti\react>
```

Outra versão da uma 'To Do List' pode ser feita [aqui](#).
